1. Receipt for proof of appliance purchase.
2. Signed water efficient washing machine recycling receipt from CRD Hartland Recycling Depot or Budget Steel Ltd.

Please forward your receipts and this application to:

Capital Regional District Water Services

479 Island Highway, Victoria, BC V9B 1H7 or Fax 474-4012

Qualifications

1. The SmartWash hi-efficiency clothes washer rebate program begins **January 1, 2006**.
2. Only qualified **new** washing machines purchased and installed **after** January 1, 2006 are eligible for the rebate. **Rebates are not retroactive.**
3. The rebate program applies to installations in new or existing residential properties which are connected to the municipal water supply serving Greater Victoria, Sooke and designated portions of the Juan de Fuca Electoral Area. Properties on private wells are not eligible.
4. This offer is available to residential properties only (houses, condos, apartments, townhouses, duplexes). Common areas are not eligible. **Commercial properties are not eligible.**
5. Any purchased hi-efficiency washing machine must be on the CRD Water Services qualified machine list for the current year.
6. Rebates are issued in order of receipt.
7. CRD Water Services reserves the right to verify both the washer and the installation before a rebate is issued.
8. To complete the efficiency cycle, old washing machines must be recycled at either of the following designated recycling depots:

Hartland Recycling Depot, #1 Hartland Avenue

A signed water efficient washing machine recycling receipt must be obtained from an attendant as proof of drop off. There is a \$3.00 charge.

Budget Steel Ltd. 2770 Pleasant Street, Victoria

A signed water efficient washing machine recycling receipt must be obtained from an attendant as proof of drop off. There is no charge.

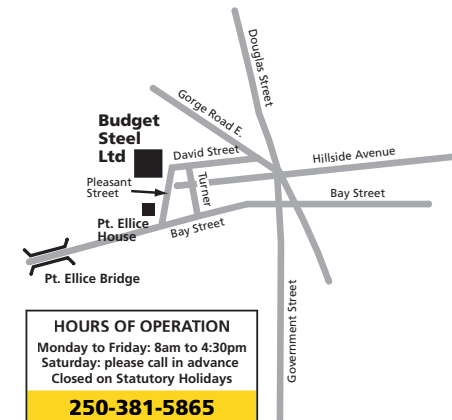

Hartland Recycling

Hartland Recycling is located at Hartland Landfill on Hartland Avenue, 15 km north of Victoria.

Budget Steel Ltd.

Budget Steel Ltd. is located at 2770 Pleasant Street in the Rock Bay area of Victoria. Find them on the web at: www.budgetsteel.com.

479 Island Highway, Victoria, BC V9B 1H7
Telephone 474-9684 Fax 474-4012

Start your long-term laundry savings with

a **\$125** rebate!

ONLY QUALIFIED WASHING MACHINES PURCHASED AND INSTALLED AFTER JANUARY 1, 2006 ARE ELIGIBLE FOR THE REBATE.

How to Choose the Right Machine

A Laundry Revolution

Hi-efficiency washing machines, now available in both front and top loading models, are revolutionizing the way we do our laundry. Both front loaders and some top loaders use much less water to clean clothes and because they spin out more of the moisture than traditional machines, less energy is needed to dry clothes.

The Benefits of a New Hi-efficiency Clothes Washer

Independent testing has shown that hi-efficiency clothes washers:

- Use 35 to 50 percent less water
- Use 50 percent less energy
- Get clothes cleaner
- Rinse more thoroughly
- Use less detergent
- Are gentler on clothes
- Save space without sacrificing capacity
- Help preserve the environment through reduced resource use

All the machines on CRD's approved list offer excellent water and energy savings. However, some models offer even greater savings than others. Ask your retailer to show you the water and energy savings for different models so you may compare. Some or all of the following choice tips might be useful.

1 Qualified machine list

Get a copy of the CRD approved hi-efficiency clothes washers. To obtain the list visit your local appliance retailer or call CRD Water Services at 474-9684 or log on to our web site www.crd.bc.ca/water.

2 Capacity size

Hi-efficiency clothes washers come in a variety of tub capacities ranging from about 1.6 cubic feet up to 3.1 cubic feet. When purchasing a new washer choose a size that most closely matches your laundry needs.

3 Raised platform or use top loader

If you have back problems you may consider placing a platform under your front loader, or the purchase of a hi-efficiency top loader.

4 Stackability

If you have a limited space such as an apartment or condo you may want to consider stackable appliances.

5 Fabric settings

Machines with the choice of wash cycle times, fabric settings such as regular, permanent press, delicate and hand wash and pre-wash and soak options allow the most flexibility.

6 Water temperature settings

Make sure the machine has a good selection of water temperatures such as extra hot, hot, warm, cool, cold.

7 The right detergent

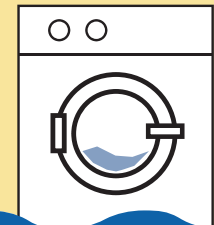

No matter which hi-efficiency machine you buy, you need to re-think your detergent use. Regular detergents do not work well in these new machines as they can create excess suds, which can overflow and actually damage these new machines. To prevent excessive sudsing, HE or low sudsing detergents should be used. These detergents are readily available at local stores.

To Get Your

\$125

Rebate
